Company history/background

Injected Belako is a company established on 1 July 1992 for the subcontracting of castings by cold chamber injection of non-ferrous metals, aluminium, brass and zamak.

We have a specially prepared machinery for the production of short and medium series whose weight ranges from 0. 015 to 2. 5 kg depending on the type of raw material used.

Stainless steel ball polisher for the polishing of parts.

Drying tunnel for the drying of parts.

Double arm sanding machine for sanding and manual polishing of parts.

Lathes, table drill, saw and other workshop machinery.
