#### Ergebnis vor Steuern

€ 0 - € 100.000

### Firmengeschichte / Hintergrund

During the COVID-19 pandemic, we have developed a unique technology improving the properties of masks.

A unique product certified in the European Union and the UAE. It is the only mass production in the world.

We have created a special material with bactericidal properties which kills viruses, fungi and microbes.

NANOMASK replaces 10 ordinary medical masks and has self-cleaning properties, the mask can be used to 24

hours.

The products have been tested in the laboratories of the European Union, proving their effectiveness.

High-quality masks are in great demand in medical organizations, regardless of the pandemic

What do we offer?

Sale of all technology and all exclusive rights to it.

A highly rated website that has been operating for 2 years and is fully prepared for commercial activities.

100% of the company's shares and the right to medical certificates. List of international customers.

1,100,000 ready-made masks.

Material for the manufacture of 500,000 masks.

High-quality equipment (the list is available on request).

2 month assistance of our specialists to transfer and set up your new business in USA.
