Company history/background

The company was founded in 2020 and has been continuously expanded and developed ever since.

The company building was newly constructed in 2022 and houses a car repair shop, which is leased for another eight years.

In addition, an energy storage facility is currently under construction on the property, which will generate stable income for the next 20 years.

The total return on the purchase price of the property is 11.9%.

Trading in vehicles of all brands as well as new OE spare parts since 2026. Remaining stock and large quantities available — ideal conditions for high profit margins in resale.

Unique selling points

Established online presence: Professionally built website with over 30,000 users per month and high reach within the target group.

Excellent purchasing conditions & network: Long-standing contacts with manufacturers and suppliers at home and abroad enable the best purchasing prices and reliable product availability.

Seamless handover: All business relationships, contacts and existing infrastructure will be fully handed over to the buyer, ensuring a smooth transition and immediate continuation of the business.

Other

Note regarding the scope of the sale: The sale is exclusively as a complete acquisition (asset deal). This includes the company with all its business units and the associated property. Separate acquisition of individual components is not possible.
