This company develops and supplies security equipment for supermarkets. This is done through a combination of traditional solution and artificial intelligence. In connection with an expansion of the existing package, the entrepreneur is looking for growth capital, which will be used to develop a number of functions and to optimize the operation.

Unique selling points

The company has a track record with large retail chains, and they want to further expand the current solution to provide better service.

Other

The company has a capital requirement of 500,000 euros for the coming period. The investment can be a share transaction, a loan or a combination of both. The entrepreneur is well known in the retail world and the company already has several existing large retail chains as customers.
