Company history/background

Location-independent online business opportunity!

Two USA Delaware LLCs – Non-resident, fully set up, ready for business.

Two Ready-to-Launch Applications

1. Personal Assistant App: Tailored for middle-aged and senior users, this app consolidates daily management essentials—groceries, passwords, finances, documents, and more—in one secure, encrypted platform. Large

fonts and an intuitive design ensure a seamless user experience, putting all important info in one safe place.

2. Emergency Info App: Paired with physical SOS bracelets and tags, this app allows users to access essential emergency information quickly. Comes with an inventory of high-quality SOS products worth \$10,000, ready to sell.

Both apps are hosted on a super secure server, all data is encrypted and protected.

This business allows you to work from anywhere in the world without a physical presence!

Secure a path to financial freedom with this opportunity in the booming digital nomad economy.

We've been working on this project for 3 years, but my other companies are consuming too much of my time and therefore I prefer to give an entrepreneur with knowledge of applications (but without the need to have any programming skills since all design and programming has been done by a software company in India, who is also responsible for launch and maintenance in the future.

Unique selling points

There is no app that offers any functionality comparable to this and the main USP of the app is the simplicity and user friendliness of the app, combined with its target audience.

Other

The entrepreneur only requires good managing skills and knowledge of internet / social marketing, or the ability to surround him/herself with the required expertise. The business can be managed from anywhere in the world as long as you have a stable and fast internet connection.
